

There When You Need It, Gone When You Don't.

# HOSE ENCLOSE™

Grade-level Garden Hose Enclosure

## Out-of-Sight

Hose storage just below ground level.

## Convenient

Lift the lid to access the hose and water.

## Complete

Garden hose, nozzle and built-in plumbing.

5-Year Limited Warranty

**CARSON**®

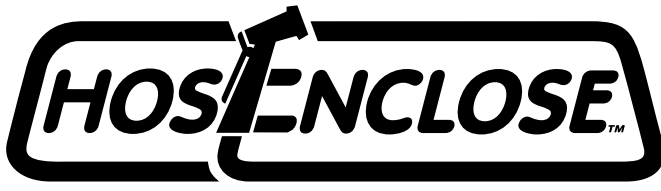

Eliminates unsightly clutter with hose stored out of sight. Hose safely stored under the lid to avoid accidents.

Nozzle has comfortable grip and six adjustable spray patterns.

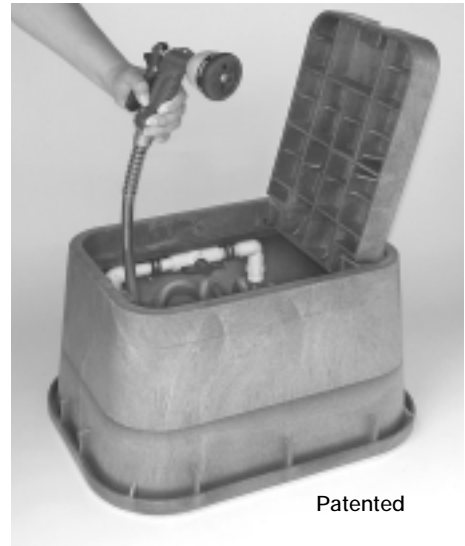

Connects to water line with built in PVC union.

Offers quick, convenient access to water and garden hose

Carson Industries, well known for its valve enclosures, introduces HosEnclose, a molded plastic enclosure with plumbing, hose and nozzle all in one complete package.

Homeowners will find a HosEnclose handy near potted plants, the patio for quick clean ups and the driveway to wash the car. The HosEnclose is installed below ground, similar to a valve enclosure, exposing only the lid at grade level. When the HosEnclose lid is down the hose is completely out of sight, leaving no clutter to look at or hose to trip over.

**Features**

<b>Convenience</b>	Hose always readily available for use, easily returned to storage
<b>Space saver</b>	Does not take up space or clutter patio, driveway, garage or yard
<b>Out of sight</b>	Stores the hose out of sight when not in use eliminating clutter
<b>Durable</b>	Molded high-density polyethylene provides long-lasting strength
<b>Warranty</b>	Limited five year warranty, excluding hose and nozzle
<b>Safety</b>	Hose stored safely away to avoid accidental tripping and falling

**Components**

<b>Enclosure</b>	Molded structural foam high-density polyethylene provides rigidity, strength and dependable service
<b>Lid</b>	Hinged lid with recessed handle for easy access, strong enough to withstand pedestrian and light incidental traffic when closed
<b>Floor</b>	White polyethylene floor brightens the interior, keeps the hose clean and discourages creatures from nesting inside
<b>Hose</b>	Coiled polyurethane hose will last longer due to limited exposure to the sun's deteriorating UV rays
<b>Nozzle</b>	Metal body with comfortable urethane grip and 8 adjustable spray patterns, clip on lid keeps nozzle within easy reach
<b>Plumbing</b>	Built-in PVC plumbing components including full-flow ball valve and easy connect 1/2" PVC union

**Models**

<b>Standard: #B32G, T or B</b>	15 7/8"x 21 1/8"x 12"h enclosure, with 50' 3/8" ID coiled hose & spray nozzle
<b>Jumbo: #B43G, T or B</b>	18 3/4"x 25 3/4"x 12"h enclosure, with 60' 1/2" ID coiled hose & spray nozzle

Available colors in both models: Green (G), Desert Tan (T), Pine Mulch Brown (B)

**Cold weather applications**

For installations in areas susceptible to freezing temperatures, adequate drainage and freeze protection must be provided.

**Codes**

Make sure all safety rules, applicable national and local building codes are observed during installation. Most existing irrigation systems already include a backflow prevention device; however for those that do not or for new systems, the Uniform Plumbing Code recommends installation of a backflow prevention device.
